

IDEATION PHASE

Define the Problem Statements

Date	31 January 2026
Team ID	T-12
Project Name	FinVault – Virtual Stock Trading Platform
Maximum Marks	2 Marks

Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love. A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

Example:

I am Describe customer & attributes	Describe the customer and their attributes here. (e.g., A beginning retail investor with no trading history).
I'm trying to List the outcome to achieve	List the thing they are trying to achieve here. (e.g., Practice placing mock stock buy and sell orders).
but Describe problems or barriers	Describe the problems or barriers that get in the way here. (e.g., I am afraid of losing my limited personal savings).
because Enter root cause of problem	Describe the reason the problems or barriers exist. (e.g., Real-world brokerage accounts require starting capital and expose users to immediate market losses).
which makes me feel Describe emotional response	Describe the emotions resulting from the barrier. (e.g., Anxious, confused, and hesitant to learn).

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A college business student with zero stock market experience.	Understand order book execution and build a virtual portfolio.	I am afraid of committing my real money to the stock market.	Opening real accounts has high barrier capital requirements and carries live financial risks.	Intimidated, confused by dense financial systems, and reluctant to start.
PS-2	A high school economics teacher hosting a finance unit.	Organize mock trading challenges and monitor a class of 30 students.	Available simulators are overly complicated or require credit card details.	Most applications are geared towards commercial retail markets rather than classroom administrative oversight.	Frustrated, limited in teaching tools, and overwhelmed by setup.
